In Claims (Clear version)

---

1. A self watering tray for a plant pot, comprising:  
a plate, the plate having side walls and a bottom wall, the plate holding  
fluid; and  
I 1  
at least one support extending from the wall of the plate either side wall  
or bottom wall, or between the side and bottom wall for supporting a plant pot, the  
supports separate each other, and not hollow, the at least one support making  
enough space for reserving fluid in the tray.

---

27. A self watering tray for a plant pot, comprising:  
a plate, the plate having side walls and a bottom wall, the plate holding  
fluid; and  
I 2  
at least one leg coupled to the plate, the at least one leg having two  
sections, up section and low section, the up section is smaller than the low section,  
each of them having a closed side wall, a shoulder between the up section and the  
low section supporting the plant pot.

---

29. The tray of claims 1, further comprising a fluid intake lip, the fluid  
intake lip disposed on the side walls of the plate, so that fluid can easily be  
added into the plate through the fluid intake lip.  
I 3

---

44. The tray of claim 27, wherein the at least one leg filled with a fluid  
sucking material which provides a fluid conduit capable of sucking fluid from the  
plate.  
I 4

---

45. The tray of claim 27, wherein a wick is accompanied while the at least  
one leg can not be filled fluid sucking material.

---

47. The tray of claim 1, further comprising a wick, the wick provides a fluid conduit capable of sucking fluid from the plate.

48. The tray of claim 47, further comprising a tube, the wick insert into the tube.

49. The tray of claim 27, further comprising a fluid intake lip, the fluid intake lip disposed on the side walls of the plate, so that fluid can easy be added into the plate through the fluid intake lip.

50. (new) The tray of claim 29, wherein the at least one support having second section, the second section extending upwardly from the support.
